The *Linux Users' Group of Davis* presents:

Revision Control

Round table

Monday March 15, 2010 7pm – 9pm	Explorit Science Center 3141 5th Street Davis, CA 95616

A round table discussion on the various ways people use different **revision control systems**: RCS, CVS, SVN, git, Hg, etc.

Non-programming uses: Note-taking, grub config syncing, photo transfers, website updates, and other purposes!

Plus a comparison of *centralized* versus *distributed* version control, and an explanation of version control to those who have never used it and aren't necessarily programmers or from a Computer Science background.

Free & open to the public!
