The Linux Users' Group of Davis presents:

"Printrbot Simple" 3D Printer
presented by Tim Feldman, Davis Makerspace

Come learn about the "Printrbot Simple" kit-based 3D printer, and the process of using Linux software for 3D printing – getting designs for 3D-printable objects, either by downloading free designs from the Web, or by designing them yourself using free software, and controlling the 3D printer under Linux.

Also learn about Davis Makerspace, a free local resource for all kinds of creative people. The space has 3D printers and other tools used by makers; and most importantly, it has knowledgeable people who love sharing their expertise and enthusiasm about all things geeky, including Linux.

Monday, October 21st 7:00pm – 9:00pm **Free & open to the public**	Davis Public Library Blanchard meeting room 315 East 14th Street Davis, CA
