LUGOD
years

The **Linux Users' Group of Davis** celebrates 10 years of service to the community with a presentation by **Allison Randal**, chief architect of **Parrot**, a virtual machine like no other that targets dynamic languages like *PHP*, *Python*, *Ruby*, and *Perl.* Her talk will briefly explain th overall architecture of Parrot and teach the skills needed to get started hacking in Parrot.

Allison Randal is chief architect and lead developer of Parrot, and chair of O'Reilly's Open Source Convention. In 25 years as a programmer, she has developed everything from games to linguistic analysis tools, e-commerce websites, shipping fulfillment, compilers, and databas replication systems, worked as a language designer, project manager, conference organizer, editor, and consultant, been president of an open source software foundation, written two books, and founded a tech publishing company.
