The Linux Users' Group of Davis presents:
Darrow Wehara, Higher Education Team,
Silicon Graphics, Inc.

The SGI "Altix" Series
Linux-based servers and superclusters

The recently-introduced Altix 350 mid-range system scales from one to sixteen 64-bit Intel Itanium 2 processors and up to 192GB of shared memory, while the Altix 3000 can use a whopping 64 CPUs and 4TB of memory. SGI plans to support up to 512 CPUs by the end of 2004.

Monday, April 19
6:30pm – 9:00pm

Davis Public Library
